Key Screens & Deliverables

Iterative progression and high-fidelity output delivered across design phases

Phase 1: Wireframes

39 Screens

Low-fidelity schematic wireframes establishing interface layout, information architecture, and core user flow logic before establishing visual styling.

- Authentication & login path wireframes
- Buyer app primary journey maps
- Transactional checkout canvas layouts
- Vendor portal seller dashboards
- Multiple interactive stakeholder tour wireframe boards

Phase 2: High-Fidelity Mockups

122 Screens

Pixel-perfect production visual designs incorporating final typography scaling, rich UI layout styling, color theory application, and native OS components.

- Complete buyer application (Search, Products, Cart, Profile)
- AI-powered interactions (Voice Search, Style Match, AI chatbot)
- In-app creator beauty marketplace (Directory, scheduling)
- Vendor platform onboarding & dashboard suites

Phase 3: Interactive Prototypes

147 Screens

Connected clickable/tappable dynamic prototypes mapped in Figma to replicate production micro-interactions and end-to-end user navigation.

- Splash screen onboarding sequence transitions
- Complete transactional purchase loop branches
- AI-driven product search and filtering scenarios
- Simulated error states and utility edges (No Match Found, Payment Failed)

Design Hub Master Reference

191 Screens meticulously organized within a unified Figma Design Hub, serving as the absolute single source of truth for engineering.

Additional Artifacts

- 5 Documented Complex User Flows
- Logo & Corporate Brand Identity Concepts
- Responsive Web Landing Page Layouts
