Design System — Core Components

A scalable component library powering consistency across 500+ screens

01 —

Component Library Overview

Built a comprehensive design system with 20+ reusable components and 50+ variants, ensuring visual consistency and development efficiency across the entire application.

02 —

Core Components & Variations

COMPONENT NAME	VARIANTS & DESIGN DETAILS
Button	12 variants (primary, secondary, ghost, sizes, states)
NavTab	10 variants (active, inactive, with badge, icon variations)
Badge	5 variants (status, notification, count, label types)
ProductCard	4 variants (grid, list, wishlist, comparison)
ProductGallery	4 variants (carousel, grid, fullscreen, thumbnail)
InputField	3 variants (default, focused, error states)
PriceRow	3 variants (regular, discount, comparison)
PaymentMethodRow	2 variants (selected, unselected)
Floating Login Card	2 variants (login, register)
Search Section	2 variants (collapsed, expanded)
Device Shells	StatusBar (iOS standard), AppBar, BottomNav, HomeIndicator
Commerce Atoms	CartItem (qty control integration), QuantityStepper, Hamburger Button

Design Principles

♻️ Reusability

Every component designed for maximum reuse across screens and flows

📐 Consistency

Unified spacing, typography, and color tokens across the entire app

🔧 Scalability

Component variants built to accommodate future business features
