TheEvents

E-Commerce Mobile Application

End-to-End Product Design — From Research to Developer Handoff

ROLE	FORMAT	SCOPE
Lead Product Designer & UX Researcher	iOS & Android Native App	Middle East Market

01 —

About the Project

TheEvents is a full-featured e-commerce mobile application for the Middle East market, covering the complete buyer experience, vendor/seller marketplace, AI-powered shopping features, beauty creator platform, and purchase-to-delivery flows. As the sole designer and researcher, I owned the entire product design lifecycle — from initial user research and information architecture through wireframing, high-fidelity visual design, interactive prototyping, design system creation, and developer handoff.

02 —

My Design Execution Roles

UX Researcher

User research, personas, journey mapping, information architecture, usability testing

UI Designer

Wireframes, high-fidelity mockups, visual design, design system, component library

Prototyper

Interactive prototypes, micro-interactions, user flow connections, developer handoff
