Project Overview

Project Name	ClinicHub — Healthcare Booking & Management Platform
Project Type	End-to-End Product Design — Web Application (Desktop)
Industry	Healthcare / HealthTech / SaaS
Timeline	Full design lifecycle — Research through Dev Handoff
My Role	Sole Designer & UX Researcher — responsible for all design and research deliverables from discovery to developer handoff

Research & Strategy

- Conducted user research, competitive analysis, and stakeholder interviews
- Defined user personas, journey maps, and information architecture
- Identified pain points in existing healthcare booking experiences
- Established design principles and product requirements

Design & Execution

- Built a scalable design system with tokens, components, and variables
- Created wireframes, high-fidelity mockups, and interactive prototypes
- Designed 100+ screens across 5 portals (Public, Patient, Clinic, Admin, Doctor)
- Implemented RTL (Arabic) layouts and internationalization support
- Designed micro-interactions, UI states, and keyboard focus specifications

Handoff & Collaboration

- Prepared detailed design specs and component documentation
- Delivered annotated prototypes for developer handoff
- Created accessibility specifications including focus states and contrast compliance
