PROFILE

UI/UX Designer with 6+ years of experience designing end-to-end digital products across mobility, fintech, and e-commerce in the UAE. At Kief Consultancies & Technologies (Abu Dhabi), served as sole designer across multiple live products — owning the full lifecycle: user research, information architecture, high-fidelity UI, design systems, and developer-ready Figma handoffs. Brings a rare hybrid background in full-stack development (HTML, CSS, Java) enabling precise engineering collaboration. Applies UX psychology principles (Fitts' Law, Hick's Law, Gestalt, Jakob's Law) to deliver intuitive, research-informed user experiences. Experienced in stakeholder presentations across fast-moving product environments.

Taggo — Multi-Service Super App **MOBILITY . SAAS**

Ride-hailing · Cargo Delivery · Car Recovery · Vehicle Rental

- Conducted user research and stakeholder interviews to map behavioral patterns, define user personas, and structure service flows for both driver and passenger experiences
- Built a scalable design system with token-based colour variables, reusable components, and spacing documentation ensuring consistency across 47+ screens
- Designed complete cargo driver and passenger flows: pickup, hub handover, real-time tracking states, and delivery confirmation with signature capture
- Created interactive Figma prototypes used directly in stakeholder presentations and engineering sprint reviews
- Collaborated with engineers through QA rounds and annotated handoff files, reducing backand-forth and implementation errors across development cycles

TheEvents — E-Commerce Platform iOS . Android . E-com

Responsive platform for car rentals, used car sales & number plate resale

- Designed the full mobile shopping experience: homepage, browsing, product detail, cart, checkout, payment, and order tracking flows
- Created low-to-high fidelity wireframes to map navigation hierarchy and purchase behavior patterns before visual design
- Built a reusable component library — buttons, tags, rating stars, form fields — maintaining visual consistency across iterations
- Delivered complete Figma handoff with organized layers, frame naming, developer notes, and exported production assets

Kief.ae · Marcaroma.ae · Stajr.com WEB . BRANDING

Corporate, luxury lifestyle & platform web design

- Delivered brand-aligned web experiences for corporate and luxury clients — visual consistency, UX clarity, and stakeholder alignment from concept through handoff
- Produced responsive UI layouts and design system components across desktop and mobile breakpoints
- Facilitated design critique sessions with cross-functional teams to validate direction and iterate toward approved deliverables

Design Process & Impact Highlights CROSS - PROJECT

- Established a shared design language and token system adopted across all company products — reducing design inconsistencies and speeding up future feature delivery
- Introduced structured design review checkpoints into the sprint cycle, improving alignment between design intent and final implementation quality
- Mentored junior developers on reading design files effectively, reducing handoff revision cycles by approximately 40% across product teams
