PROFILE

UI/UX & Product Designer with 6+ years of experience researching, designing and shipping end-to-end digital products for the UAE market across mobility, e-commerce and food & beverage. Works as researcher and solo designer — from user research, competitor benchmarking and information architecture to high-fidelity UI, token-based design systems and developer-ready Figma handoff. Specialises in AI-powered experiences, including conversational and voice-driven booking, ordering and recommendations, and in bilingual Arabic/English interfaces with correct RTL/LTR behaviour. A hands-on development background (HTML, CSS, Java) and grounding in UX psychology — Fitts', Hick's, Miller's and Jakob's Laws, Gestalt and Nielsen heuristics — keep decisions evidence-based and buildable.

AI-Powered UX | Conversational & Voice UI | UX Research | Product Design | Design Systems | Arabic RTL / LTR | iOS · Android · Web | Figma

EMPLOYMENT HISTORY

Kief Consultancies & Technologies

May 2024 – Present

Senior UI/UX Designer · Abu Dhabi, UAE · Full-Time

- Sole designer across multiple live products, including Taggo and TheEvents, owning research, UX, UI and developer handoff end to end
- Established a shared design language and token system adopted across company products, reducing inconsistencies and speeding up feature delivery
- Introduced design review checkpoints into the sprint cycle and mentored developers on reading design files, cutting handoff revision cycles by ~40%

Hubble Web Technologies

Dec 2022 – Dec 2023

UI/UX Designer · Dubai, UAE · Full-Time

BitsnPixs

Feb 2019 – Jun 2022

UI/UX Designer · India · Full-Time

KEY PROJECTS

Taggo — AI-Powered Ride-Hailing Super App

IOS · ANDROID

Researcher & Solo UI/UX Designer

Four services in one app: Live Rides · Rental (with or without driver) · Cargo · Car Recovery

- Led user research and stakeholder interviews to map rider and driver behaviour, define personas and structure four services into one coherent app
- Designed an AI assistant that books rides, rentals, cargo and recovery through conversation, and answers questions on UAE weather and cultural events
- Benchmarked Careem, Uber and Yango; produced ~72-screen driver app UX documentation and a 25-screen onboarding spec with microcopy and handoff notes
- Designed end-to-end flows: live ride tracking, rental booking, cargo pickup, hub handover and signature confirmation, and tow-truck recovery for driver and customer apps
- Built a token-based design system keeping 47+ screens consistent across Arabic RTL and English LTR, with Dirham formatting and prayer-time-aware notifications
- Designed the Taggo Plus subscription programme (three tiers benchmarked against Uber One and Careem Plus) and reviewed built screens with severity-tagged QA findings

TheEvents — AI-Powered E-Commerce Marketplace IOS · ANDROID · WEB

Researcher & Product Designer

Multi-vendor marketplace serving the UAE, with GCC expansion planned — for shoppers, vendors, brands, makeup artists and celebrities

- Researched shopper and vendor needs to design the full buying journey: discovery, product detail, cart, checkout, payment and order tracking
- Designed vendor dashboards on mobile and web for listing products, managing orders and cashing out earnings directly in the app
- Designed follow-able profile pages for brands, makeup artists and celebrities, so shoppers receive their latest offers in one feed
- Designed an AI shopping assistant that gives personalised product suggestions and lets users order hands-free by voice, Siri-style
- Built a reusable component library, delivered organised Figma handoff with developer notes, and designed an 18-slide vendor pitch deck

Noma — The Coffee Shop App IOS · ANDROID

Researcher & Product Designer · Client Project

Mobile ordering app designed for a coffee shop client

- Researched customer ordering habits and the client's brand goals to define personas and the core ordering journey
- Designed the end-to-end mobile experience: menu browsing, drink customisation, cart, checkout and order status
- Created brand-aligned UI with a reusable component set and developer-ready Figma handoff

SKILLS

AI & Emerging UX	Conversational UI, Voice User Interfaces (VUI), AI assistant flows, AI recommendations & personalisation, prompt design for AI features, AI-assisted design workflows
UX Research	User & stakeholder interviews, personas, journey mapping, competitor benchmarking, usability testing, heuristic evaluation, UX audits, research synthesis
Product & UX Design	Information architecture, user flows, wireframing, interactive prototyping, product specs & UX documentation, responsive & mobile-first design
UI & Design Systems	Design tokens & variables, component libraries, Light/Dark modes, visual hierarchy, micro-interactions, developer handoff
Localisation & Access.	Arabic RTL / English LTR mirroring, bidirectional typography, WCAG 2.1 AA, accessible colour & contrast
Collaboration	BA & frontend collaboration, stakeholder presentations, design QA against approved designs, sprint reviews, Agile / Scrum
Tools	Figma (Variables, Auto Layout, Components, Prototyping, Dev Mode), FigJam, Claude, HTML, CSS, Java
Principles & Standards	Fitts', Hick's, Miller's & Jakob's Laws, Gestalt, Nielsen heuristics, Apple HIG, Material 3, Baymard

EDUCATION

MBA — Bharathiyar University 2017
